

# CBME Newsflash!

---

## *Dispelling* MYTHS of CBME

**PROGRAM residency will still be X years**

---

**Rotations will still be defined durations,  
the same for all residents.**

---

**Rarely will a resident advance at faster rate.  
If a resident is struggling, residency could be  
extended, same as now.**

---

**EPAs are only a portion of CBME assessment**

---

**Other evals, such as ITARs, will still be used**

---

**CBME should occur in parallel to daily,  
clinical work**

---

**EPA assessments will not need to be done  
every day**

---
